

Lab – Vue.js Instance

Task

- Create a **Vue.js app** that display the information of one lesson
- It should have at least the following information:
 - Subject
 - Location
 - Price
 - An image or icon
- The lesson information must be stored in the **data** component of the **Vue.js app**:
 - the **image file path** must be in the **data** ;
 - the **image file text** (**alt**: alternate text for the image; [docs](#)) and **path** must be in the **data**.
- Make sure also to manage correctly the **image size** ([example](#) , or better with [CSS](#)): it is not needed to have size info in the **data**.
